Design an agent

wcb Workers' Compensation Board – Alberta | Deloitte.

Table | Our task | Our agent's name

1 Take a task
One step of the claim, below. Your facilitator assigns it.

2 Design it · 5 min
Fill in the four parts. Pull from the ingredients, or write your own.

3 Share back · 30 sec
Its name and goal, one instruction, and one check.

THE TASKS: ONE AGENT PER STEP OF THE CLAIM

- **Intake agent** Opens each new claim and checks the worker's and employer's details are complete.
- **Evidence agent** Requests the doctor's notes and employer records, and chases what's late.
- **Decision support agent** Checks the claim against policy and recommends; a person decides.
- **Payment agent** Calculates benefits from earnings and lines up payments for approval.
- **Sorting agent** Routes each claim to the right team and adjudicator on the day it arrives.
- **Medical summary agent** Turns a thick medical file into a one-page summary with sources.
- **Letters agent** Drafts clear, kind letters to the worker and employer for a person to send.
- **Return-to-work agent** Plans a safe return to work with the worker, employer and doctor.

WHAT MAKES AN AGENT	YOUR DESIGN	INGREDIENTS TO PULL FROM
Goal What is this agent for?		Get the claim ready for a decision Route every claim the same day Find what's missing, early Keep the worker informed A safe, early return to work
Instructions How should it behave?		Use plain, kind language Never guess: ask a person Cite the policy it used Flag anything unusual Never change claim details Stop if facts conflict
Memory What should it know about the claim?		Injury report Employer report Doctor's notes Earnings and pay stubs Calls and emails so far Earlier claims
Tools What can it use?		READ Claim file READ Policy search DRAFT Letter to the worker ACT Email a clinic ACT Assign the claim ACT Schedule a payment
Autonomy optional Read, draft or act? When does a person approve?		Suggests Drafts for a person Acts with approval Acts, then reports Acts alone Letters, payments: a person approves

GOOD INSTRUCTIONS GIVE IT

The right instructions
Say what good looks like, the rules, and the tone

The right actions
Name what it may do on its own, and what it may not

The right checks
When it stops and asks a person, and how we test it

EXAMPLE: SORTING AGENT

Goal	Route every new claim to the right team and adjudicator the day it arrives, so no claim waits in a queue
Instructions	Follow the routing rules for injury type and region · Spread work fairly across adjudicators · If a claim is complex or unclear, send it to a person and say why · Never change claim details
Memory	Injury type, body part and severity · Employer, industry and region · Today's team workloads and who is away · Any earlier claims for this worker
Tools	Read: the claim file and the routing rules · Act: assign the claim in the claim system · Draft: a note to the team lead when it's unsure
Autonomy	Acts alone on clear claims, every step recorded · Hands to a person: complex, disputed or psychological claims · Each week a team lead reviews a sample of its routing

A person approves anything that reaches the worker or moves money: letters and payments.

Composite example. Not a real claim or person.
